

AMENDMENTS TO THE CLAIMS:

Please cancel Claims 14, 16 through 22, and 25 without prejudice to or disclaimer of the subject matter recited therein.

Please amend Claim 11 as follows:

1-10. (Cancelled)

11. (Currently Amended) A polymer-containing composition comprising a block polymer compound, water or an aqueous solvent, and a functional material,

wherein the block polymer compound comprises block segments A, B, and C arranged in succession,

the block segment B is a hydrophilic block segment,

the block segment C is most hydrophilic while the block segment A is most hydrophobic,

the block segment C has an ionic group or an acidic group, and

the block segment C is a repeating unit represented by the following general formula

(1):

wherein R^0 represents -X-(COOH)_r or -X-(COO-M)_r ; X represents a linear, branched or cyclic alkylene group with 1 to 20 carbon atoms, $\text{-(CH(R}^5\text{)-CH(R}^6\text{)-O)}_p\text{-(CH}_2\text{)}_m\text{-CH}_3$, r, p, m are integers of 1 or more,

$-(\text{CH}_2)_m-(\text{O})_n-(\text{CH}_2)_q-\text{CH}_{3-r}$ or a structure in which at least one of methylene groups therein is replaced by a carbonyl group or an aromatic ring structure; r represents 1 or 2; p represents an integer from 1 to 18; m represents an integer from 0 to 35; n represents 1 or 0; q represents an integer from 0 to 17; M represents a monovalent or polyvalent cation; and R^5 and R^6 , which may be the same or different, each independently represent an alkyl group,

wherein the block segment B is a repeating unit represented by either one of the following formulae:

12. (Previously Presented) The polymer-containing composition according to claim 11, wherein the functional material is included in the block polymer compound.

13. (Previously Presented) The polymer-containing composition according to claim 11, wherein the functional material is a colorant.

14 - 25. (Cancelled)
